Photoshop
HTML 5
CSS 3
Time Management
Client Relations
Web Design
Web Development
UI & UX Design

EDUCATION

Southeast Community College — Lincoln Nebraska

Graduation Date — May 2023

The GDMA program is an accelerated 2 year program covering many aspects of graphic design. We focused heavily on learning design programs and software which I became proficient in. We also had a focus on client relationships, speaking to specific audiences and creating design briefs. Accountability and time management was a key part of being successful throughout my education.

EXPERIENCE

ABC | Graphic Design Intern (2022 – 2023)

As a graphic design intern at ABC, I was responsible for designing and developing their website for their Lincoln branch. In addition, I created a social media campaign that would be launched every Thursday for all of 2023, as well as several other promotional campaigns. Team collaboration and time management was a big part of this job and aided in my growth as a designer.

Sonic | Manager (2020 – 2023)

During my time as a manager at Sonic, I was responsible for leading my teammates and monitoring production. As well as working closely with employees, I was also involved in customer service. Being in communication with guests helped to build my problem solving and communication skills. Each day I was responsible for counting money and making records of the day.

Junior Saltdogs | Umpire (2018 – 2020)

As an Umpire for the Junior Saltdogs, I was responsible for controlling the flow of the game and de-escalating heated situations between team members. I was also responsible for officiating the games and was a leader to my teammates. This experience helped me learn how to work as a team as well as taking responsibility for the game, scores, and fellow teammates.
